

## HTML

```
<div id="content">
  <header id="siteheader"><h1>Site Header</h1></header>
  <nav>
    <ul>
      <li><a href="index.html">Site</a></li>
      <li><a href="about.html">About</a></li>
      <li><a href="contact.html">Contact Us</a></li>
    </ul>
  </nav>
  <article><h1>Article</h1></article>
  <aside><h1>Sidebar</h1></aside>
  <footer id="sitefooter"><h1>Site Footer</h1></footer>
</div>
```

## Assignment

1. Copy the HTML on the left inside your boilerplate.
2. Give the content div a 50em width. Center it in the page.
3. Add a paragraph of Lorem Ipsum text in the article
4. Add an image folder to your project and put a jpg inside.
5. Add the image to the paragraph, in a figure element, and floated on the right side.
6. Make the list a horizontal CSS flexbox menu.
7. Use a CSS grid to create the multi-column layout.
